10. FUNCTIONAL BARRIER

The plastic layer in contact with the food product has been validated as a functional barrier and it is confirmed that said material or object complies with the requirements of Article 13, paragraphs 2,3,4 or Article 14, paragraphs 2 and 3 of Regulation (EU) 10/2011.

11. ORGANOLEPTIC-SENSORY INERTIA AND SCREENING TESTS

With regard to the analysis of the risk of sensory damage to the food, no significant alterations in odor and flavor were detected; the analyses were carried out on the material in question under the following test conditions:

- (40±2) °C for 24h in the dark for direct contact with the following foods: rusks and processed cheese (taste test),
- (40±2) °C for 24h in the dark without food (olfactory test).

With regard to the toxicological risk analyses carried out on the material in question, it is declared that:

- SPME/GC-MS, HS/GC-MS and GC-MS screening with isooctane simulant
 - the evaluation of the set-off verification performed through HS/GC-MS and GC-MS screening
- they did not highlight dangerous compounds or quantities potentially dangerous for the consumer.

12. NIAS

NIAS substances have been controlled and managed and do not affect compliance with Article 3 of Reg. 1935/2004. Based on our supplier's declaration and to the best of our knowledge, the list of substances below is not used in production or in the formulation of these materials, in particular the following substances:

- BISPHENOL A (in accordance with the restrictions in Article 2 of Reg. 2018/213 and the requirements set out in Articles 3, 15 and 17 of Reg. 1935/2004/EC
- MOSH and MOAH (Non-authorized Mineral Oils, are not used in the production processes as ingredients of the products as constituents or additives for the production of MOCA. In this context, it must be noted that these substances are ubiquitous pollutants, therefore potentially coming from other involuntary contaminations and not intentionally added)
- PFAS (in accordance with the restrictions in Reg. 1021/2019/UE, POPs, PFAS and PFASs are under control. It must be noted that these substances are ubiquitous pollutants, therefore potentially coming from other involuntary contaminations and not intentionally added).

13. ALLERGENS AND ADDITIVES

Based on the declarations of our raw material suppliers, none of the allergenic ingredients listed in Annex II of Regulation (EU) No. 1169/2011 (reproduced below) are present in the material in question, nor are any additives or substances derived from genetically modified organisms (GMOs) added or used.

The use in industrial or commercial purposes of the material indicated in this declaration doesn't exclude the verification of its compliance with current standards of competence as well as its technological suitability for the purpose for which it's intended.

We also specify that this declaration is valid exclusively for the object we supply and cannot be extended to any transformation of the same.

With regard to the storage and marketing stages of the object sold to your Company, we declare that we:

- have implemented a company quality assurance and quality control system in compliance with Regulation (EC) No. 2023/2006;
- comply with the requirements of Art. 15, of Regulation (EC) No. 1935/2004, regarding labeling;
- comply with the requirements of Art. 17, of Regulation (EC) No. 1935/2004, regarding traceability.

In support of the above, the company declares that it has available to the competent authorities the test reports carried out and the suppliers' declarations of conformity.
